HA HOANG DANG

SUMMARY

Junior Software Developer based in Helsinki with expertise in full-stack and mobile development for early-stage startups. Proficient in React, Next.js, and Node.js, with a proven ability to deliver production features, enhance system stability, and streamline internal workflows. Experienced in collaborating within small teams, managing projects from initial scoping to final deployment.

EDUCATION

Bachelor of Engineering, **Information Technology**, **11/2025**
Oulu University Of Applied Sciences - Oulu, Finland

- GPA: **4.3**
- Thesis title: Improving the User-Experience of a User-Centered Mental Health Website to Enhance Student Wellbeing

EXPERIENCE

Mobile Developer - Intern, **08/2025 - 02/2026**
Factories Technologies APS - Denmark

- Collaborated closely with product and engineering in a small, cross-functional team to scope features, estimate effort, and ship incremental releases, shortening feedback cycles from weeks to days.
- Conducted testing and debugging to ensure application performance and reliability.
- Refactored key UI flows in React Native, improving screen load consistency, and reducing UI-related regressions during testing.
- Improved overall app stability by triaging and fixing approximately 15 high-priority bugs, reducing repeated crash reports from internal testers by approximately 40%.

Frontend Developer - Intern, **02/2025 - 08/2025**
Beiarntek AS - Norway

- Designed and implemented responsive UI with Next.js and Tailwind CSS, enhancing usability and visual consistency across core pages.
- Integrated Mistral AI-powered chatbot to address common user inquiries, reducing manual support requests during onboarding.
- Established Stripe and VIPPS payment flows with clear validation, boosting successful checkout completion for early users.
- Collaborated with founders to rapidly iterate solutions based on user feedback in a resource-constrained startup environment.

SKILLS

- **Frontend:** React.js, Next.js, TypeScript, Tailwind CSS, Zustand, Redux, Framer Motion
- **Backend:** Node.js, REST APIs, Prisma, Drizzle, tRPC
- **Mobile**: React Native, Kotlin
- **Database:** MongoDB, Convex, PostgreSQL, MySQL, Supabase, Firebase
- **DevOps / Cloud:** Git/Github, Docker, AWS
- **Other:** AI SDK, Inngest, Sentry, PostHog, Cloudinary, Stripe, VIPPS, Figma, Adobe Photoshop

LANGUAGES

Finnish: A2
Elementary (A2)

English: B2

Full Stack Developer - Intern, **07/2024 - 02/2025**
Katch Oy - Espoo, Finland

- Shipped multiple React features using Redux and REST APIs to streamline internal workflows.
- Standardized GitHub and GitLab repository workflows, reducing release cycles for minor updates.
- Refined deployment processes, enhancing reliability of application deployments.
- Optimized application performance by minimizing response times and memory consumption.

PERSONAL PROJECTS

Cortex - https://github.com/hha297/Cortex *11/2025 – 02/2026*
Next.js, TypeScript, TailwindCSS, Inngest, Convex, Clerk, AI SDK
· Built an AI-assisted in-browser IDE inspired by Cursor and modern AI developer tools, powered by CodeMirror, featuring a minimap, file explorer, and a multi-panel workspace for productive coding workflows.
· Implemented real-time collaboration and project/file sync using Convex, enabling instant updates across sessions and devices.
· Developed an AI assistant with "quick edit" suggestions and an agent capable of reading/writing/manipulating files, powered by background jobs via Inngest.
· Added in-browser execution + live preview using WebContainers, plus GitHub import/export and live docs scraping from URLs via Firecrawl.

Nodebase - https://github.com/hha297/Nodebase *08/2025 – 11/2025*
Next.js, TypeScript, TailwindCSS, Inngest, Prisma, PostgreSQL, AI SDK
· Built a workflow automation platform enabling users to create visual workflows, iegrate multiple triggers, and run background job.
· Implemented authentication, payments, and monitoring to support a production-ready SaaS architecture.
· Designed the system to support rapid experimentation, enabling faster iteration on workflow logic, and AI-powered tasks.

Calog - https://github.com/hha297/Calog *05/2025 – 09/2025*
React Native, TypeScript, Node.js, MongoDB, Docker
· Developed a fitness tracking and calorie management mobile app with secure authentication and personalized goal-setting.
· Implemented body composition analysis features, helping users better understand progress beyond basic calorie tracking.
· Focused on clean UX and performance for daily-use mobile scenarios.

Upper Intermediate (B2)

Vietnamese: C2

Proficient (C2)

CERTIFICATIONS

The Complete Full-Stack Web Development Bootcamp
- Dr. Angela Yu

NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno)
- Maximillian Schwarzmuller
